# Here is how to activate your 2-Factor Authentication!

From the sign in page, enter your username and password. Select "Sign in"

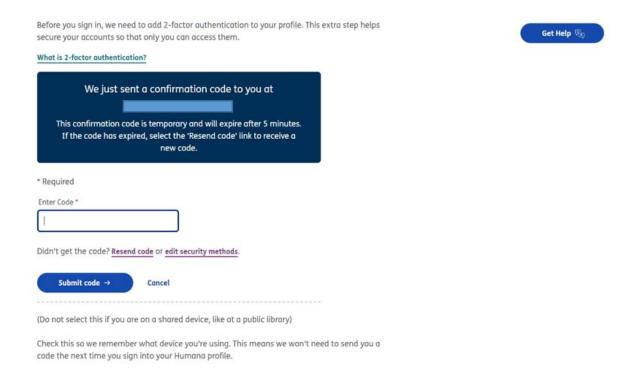

Add 2-Factor Authentication: Choose your preferred method of authentication from Email or Text. Then enter your email or phone number.

A code will be sent to your preferred method. Enter the code received and select "Submit code"

Add 2-factor authentication
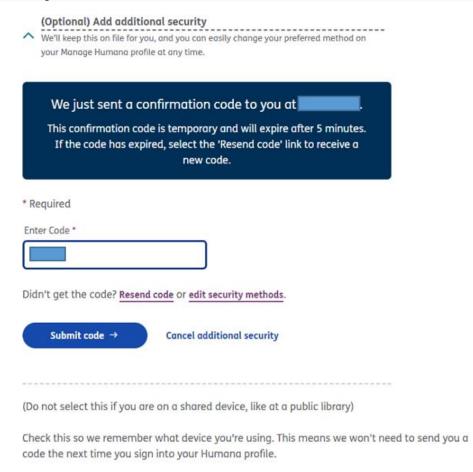

Before you sign in, we need to add 2-factor authentication to your profile. This extra step helps secure your accounts so that only you can access them.

What is 2-factor authentication?

> ### We just sent a confirmation code to you at
>
> This confirmation code is temporary and will expire after 5 minutes. If the code has expired, select the 'Resend code' link to receive a new code.

* Required

Enter Code *

Didn't get the code? Resend code or edit security methods.

Submit code →   Cancel

(Do not select this if you are on a shared device, like at a public library)

Check this so we remember what device you're using. This means we won't need to send you a code the next time you sign into your Humana profile.

Once your email or phone number has been verified, you will see a confirmation screen.

Before you sign in, we need to add 2-factor authentication to your profile. This extra step helps secure your accounts so that only you can access them.

How 2-Factor Authentication works when logging in!

After signing in with your Username and Password, a code will automatically be sent to your authentication method of choice. Enter the code, re-enter your password and check "Remember this device" to access your account.

For your security, we need to verify that it's you before you sign in. Since you are using a new device to sign in, this extra step helps secure your accounts so that only you can access them.
